PROFESSIONAL SUMMARY

Final-year B.Tech graduate in AI & Data Science, skilled in Python, PyTorch, Scikit-learn, NumPy, and Pandas. Experienced in building ML models and data pipelines end-to-end, from preprocessing to deployment. Eager to contribute to an AI/ML engineering team.

TECHNICAL SKILLS

Core AI/ML: Python, PyTorch, Scikit-learn, LLM APIs (OpenAI / Gemini)

Data Science Libraries: NumPy, Pandas, Matplotlib, SMOTE

Programming Languages: Python, Java, JavaScript, SQL

Frameworks & Tools: React.js, Git, GitHub, Jupyter Notebook

Databases & Web: SQL, HTML, CSS

Other Concepts: OOP, Data Structures & Algorithms, DBMS

INTERNSHIP EXPERIENCE

AI & Machine Learning Engineer Intern

Dec 2025 – Apr 2026

Blackbucks Education Pvt. Ltd.

- Developed and trained supervised learning models (regression, classification) using Scikit-learn on real-world datasets, contributing to end-to-end ML feature delivery pipelines.
- Built and fine-tuned deep neural networks — CNNs for image classification and RNNs for time-series prediction — using PyTorch, achieving measurable accuracy improvements over baseline models.
- Performed end-to-end data preprocessing pipelines using NumPy and Pandas: feature engineering, normalisation, outlier handling, and class imbalance correction via SMOTE.

PROJECTS

Predictive Modelling of Gene Regulation Status Using Machine Learning

Python | Scikit-learn | Pandas | NumPy

- Developed an ML model for prostate cancer gene expression analysis using RNA-seq data to classify Differentially Expressed Genes (DEGs) with high precision.
- Applied PCA for dimensionality reduction, SMOTE for class balancing, and implemented Random Forest, SVM, Logistic Regression, and KNN classifiers.
- Achieved 98.8% accuracy; evaluated with ROC-AUC, F1-score, Precision, Recall, and Confusion Matrix metrics.

SmartQuery Chatbot App

Python | PyTorch | NumPy | Pandas | HTML | CSS | JavaScript

- Developed a Python backend integrating a PyTorch-based NLP model for intent classification and context-aware response generation.
- Built preprocessing pipelines using NumPy and Pandas to clean, tokenise, and transform user input before model inference.
- Managed end-to-end lifecycle from model training to web deployment with reliable backend-to-frontend communication via Git version control.

GitHub Profile Analyzer

React.js | JavaScript | REST API

- Built a React.js frontend that fetches and displays real-time GitHub user data through REST API integration with reusable component architecture.
- Developed components for profile display, repository listing, statistics cards, and programming language analysis following React best practices.
- Tested 15+ user scenarios for reliable rendering and maintained a modular, scalable codebase with optimised API call efficiency.

EDUCATION

Sagi Rama Krishnam Raju Engineering College, Bhimavaram

2022 – 2026

B.Tech in Artificial Intelligence & Data Science

CGPA: 8.65 / 10

Narayana Junior College, Bhimavaram

2020 – 2022

Intermediate (MPC)

Score: 94%

The School, Srikalahasti

2019 – 2020

SSC

Score: 100%

ACHIEVEMENTS

- Second Place** – SRKR Orator Championship, Sagi Rama Krishnam Raju Engineering College: Secured runner-up position in the college-level public speaking competition, demonstrating strong communication, articulation, and stage presence.
